About The College

Unnamalai Institute of Technology is dedicated for guiding young engineers by providing reliable good education. We focus on the technical education of a high quality by including positive attitude, technical proficiency, and by adopting and scrutinizing with Quality Management System.

Programme Objective

- The students' abilities in the fields of electronic design and production include their capacity to develop and use computer software and hardware.

Career Guidance on Designing DC Micro grid conducted on 23.05.2022

- This Program was conducted for First, Second and Third year EEE department students, Unnamalai Institute of Technology.
- The training was started by 10.00 AM and ends at 3.00 PM for one day.
- The main objective of this program is to educate students centralized bidirectional buck-boost converter-connected Battery Energy Storage System (BESS)
- The resource person has demonstrated the basic concepts of the impact on the electrical system can be lessened by integrating distributed generation and different loads using a DC microgrid.
- At the completion of this program the students have ability to create and implement computer software and hardware in the disciplines of electronic design and manufacturing.
